WANTED—Two dining room girls. Fifth Accine batel.

I have some ideas concerning the public schools which if elected will try to carry into effect.

Rural Schools Neglected.

"I believe that the common schools of the state, where 98 per cent of the children receive their educations are being neglected. Kansas is the only state in the union which does not appropriate money for the school in the country districts and I believe that something should be done to bring a out a change in these conditions.

"Our rural schools are not what they man for hoslery and underwear; good "Our rural schools are not what they should be and I believe that the state should take steps to remody this evil. Cour state institutions are great fa-

keeping the boys and girls on the farms and they will no longer rush to the centers of population, to their own of the centers of population to their own of the common. The state superintendent, if it were entirely an educational position I do not believe that a man should hold the place for more than two terms. I was the anthor of the common schools and bring about the plank in the Democratic platform which, incorporated into a law, would bring great benefits to the common schools should receive a great deal more attention in the future than they have in the past.

"I believe that the office of state superintendent of public instruction has more executive patinated in power; in other words, I do not believe that one man should be perpatinated in power; in other words, I do not believe that one man should be perpatinated in power; in other words, I do not believe that one man should be perpatinated in power; in other words, I do not believe that one man should be perpatinated in power; in other words, I do not believe that one man should be perpatinated in power; in other words, I do not believe the office cam not honestly be restricted to as an educational one, as it is now handled, for next to the governor, the state superintendent of public instruction has more executive power than any other state official.

In the future than they have in the past.

"I believe that the office of states administration, i find that he high schools."

The people of Kansas evidently believe them a genuine business administration. I find that he has a wonderful following, especially among the heavy tax payers. With the solid Democratic vote, which he is sure of, and the assistance of the course. The people of water provided the provided that he high schools.
